

# Abdul Wali

Software Engineer | JAVA | ReactJS | Spring Boot | Microservices

I am an enthusiastic, and ambitious web developer with expertise in designing and developing user interfaces. I am passionate about creating simple and elegant solutions that make complex tasks easy to execute for users.

## Work Experience

I2C (Software Engineer - Web)

Jul 2022 - Present

JAVA | Spring Boot | ReactJS

As i2c is a fin tech company my major role was to make the existing applications secure by implementation of the CSRF token and request types filters. also have worked in PCI Audit of the web applications. for some internal web apps I have made the application efficient and re write some of the major modules that handles roles and permissions and integrated some modules.

NEXUSBERRY (Intern)

Aug 2021 - Sept 2021

React Developer | CMS | Mongo

It was a place where I practiced my skills according to the industry needs. In Nexusberry I have worked majorly in reactJS for frontend. and for backend CMS was used as per requirement by client. I was responsible for the setup of CMS integrating it with front end and databases.

## Education

Bachelors In Computer Science

COMSATS Lahore, BS(CS)

Sept 2018 - Feb 2023

## My Projects

Pet Planet - FYP

(React JS | Firebase | WEB\_RTC )

An E-Commerce System. The major part were the services included such as Appointments with a medical officer and if not possible physically our app provides a platform for online streaming.

Surveillance System (Python | Open-CV | Face Recognition )

System that uses the cam of any device and detects unknown faces and only allows known faces and record unknown

Messaging App (Connect\_X)

( React Native - JS )

It was a UI of a chatting application with integration with firebase as a simple backend. just demo app that uses APIs for messages and media. no socket was implemented in it.
